HF01234yf Electronic Leak Detector!

Sunair is proud to introduce our new HF01234yf Electronic Leak Detector.

**Sunair
Part No.
TL5105**

The STARTEK Electronic Leak Detector

- **Detects all halogenated refrigerants including R12, R22 and R134a**
- Extremely compact design concept similar to a cell phone
- Ergonomical design focused on performance and simplicity of operation
- Microprocessor controlled unit and state of the art microelectronics
- Certified to SAE J1627 Standard
- Simple one button operation
- Two sensitivity levels using a double-click computer mouse action
- High performance true mechanical pump to provide positive airflow through the sensing tip
- Leak indication using both variable frequency audible and visual alarm
- Automatic shut-off after extended period of non-use to preserve battery life
- One touch reset mode and battery life indicator
- Prevents incorrect readings by providing visual and audible warning followed by automating shut-off when battery reaches a critical level
- State of the art sensor technology for higher reliability and longer life time
- Includes a practical belt clip holster that also protects the unit in your toolbox
- Specially designed 12" (30 cm) flexible probe for easy reach
- Additional replacement sensor included inside the battery compartment
