GM HT6 Bolt-On Replacement

Sunair is proud to introduce the new GM HT6 replacement compressor.

NEW!

Sunair Part No.CO-2068CA

Direct bolt-on replacement for the GM HT6 compressor.

The **CO-2068CA** has many advantages over the original GM HT6 and traditional aftermarket replacement compressor designs.

- Seamless construction prevents center case leakage
- Direct bolt-on replacement including the clutch pigtail require no extra installation steps or modifications
- Lighter weight PAG 46 instead of the PAG 150 heavy weight oil
- Seven cylinder displacement instead of six increases low RPM pumping
 - Reliable pinion swash plate design
- All switch ports are plugged with aluminum plug that can be left installed or removed to accommodate the OE switch
